

Cape Town • WhatsApp-first • 0% commission

Design brief: logo & brand identity.

Sold Direct helps Cape Town homeowners sell privately and keep their money. The product works — now the brand needs to look like it. This brief covers the logo, identity system, social pages, icons and tweaks to the live site.

CLIENT

DATE

July 2026

BUDGET

R25,000

TIMELINE

3–4 weeks

This document borrows the current site's working style — Tailwind emerald & slate on white, www.solddirect.co.za. That style is a founder-built placeholder: evolve it or replace it, but it shows where we're starting from.

01 Background

Sold Direct is a **WhatsApp-first platform for selling your home privately in Cape Town** — 0% commission on the qualifying path, guided end-to-end by our technology, concierge team and registered property practitioners. Sellers list on WhatsApp, buyers pre-qualify in the chat, and every sale is tracked from offer to Deeds Office transfer.

A first version of the site is live at www.solddirect.co.za and Facebook, LinkedIn and WhatsApp Business channels are being registered now. The current look — emerald & slate, system type — is a working placeholder built by a founder, not a designed identity. That's the gap you're filling.

TAGLINE

"Sell your home direct. Keep your money."

TO NE

Direct, trustworthy, money-smart. Plain talk, no estate-agent gloss: "Free because the banks pay us — not you."

AUDIENCE

Cape Town homeowners selling privately (and the buyers they deal with) — people making the biggest financial move of their lives on WhatsApp. The brand must also read as credible to bank partners, conveyancers and the investors we're raising from.

✓ I'll handle most production myself using AI tools (Claude) — website builds and day-to-day content included. **Your job is to make the identity tight and codified enough that everything I produce afterwards looks like one brand.**

02 Objective

A distinctive, ownable brand identity for Sold Direct that:

- ✓ Works hard at small sizes (social avatars, favicons, WhatsApp profile) and large (website hero, deck covers)
- ✓ Is simple enough to stay consistent when applied by a non-designer
- ✓ Feels credible to banks, conveyancers and investors — trustworthy enough for the biggest transaction of someone's life
- ✓ You're not married to the current emerald/slate — evolve it or replace it. The one constraint: the site restyle must be achievable with CSS-level tweaks, not a rebuild

03 Deliverables

A Logo suite

- ✓ Primary logo — wordmark or logo + mark, your recommendation. The site currently sets "Sold" dark / "Direct" emerald; treat that as a starting thought, not a constraint
- ✓ Standalone icon/mark that works as a square avatar at 40px
- ✓ Horizontal and stacked lockups
- ✓ Mono (black), reversed (white) and full-colour versions
- ✓ Clear-space and minimum-size rules

B Brand identity system — mini brand guide, 6–10pp PDF

- ✓ Colour palette with exact values (HEX, RGB, CMYK) — which colours dominate, which accent
- ✓ Typography: one display face + one body face — Google Fonts or similarly free/web-licensed
- ✓ Logo usage do's and don'ts
- ✓ A short "voice" note if you have a view (optional)

C Social channel assets

- ✓ **Facebook page:** profile picture (square + circle-crop safe) and cover image, to current Meta specs
- ✓ **LinkedIn company page:** logo image and banner, to current LinkedIn specs
- ✓ **WhatsApp Business:** square profile image — WhatsApp is our storefront, this one matters most
- ✓ One editable post/story template per platform — simple, I'll iterate content myself

D Icons

- ✓ Favicon set (SVG + 32 / 180 / 512px PNG)
- ✓ App-style square icon — the mark on a brand-colour background
- ✓ 6–8 simple UI/feature icons in the brand style (line or solid, your call), as SVG — think listing, pre-qualified buyer, offer, transfer/tracking

E Website direction — tweaks to the live site, not a build

- ✓ A one-page visual direction for www.solddirect.co.za: header/hero treatment, button styles, colour application, spacing feel — enough for me to brief an AI coding tool accurately
- ✓ Design tokens as a simple list or file: colour variables, font stack, corner radius, shadow style (the site is Tailwind, so Tailwind-friendly values are a plus)
- ✓ All assets (logos, icons) as optimised SVGs ready to drop into the site

I'll implement the tweaks myself with Claude — you supply the direction and raw material.

F File handover

- ✓ All source files — Figma preferred, or AI/EPS
- ✓ Exported assets organised in folders: SVG + PNG at sensible sizes
- ✓ The brand guide as PDF

04 Process & timeline

- 1 Kick-off chat** (30–45 min) — walk the live site together, look at brands we like and dislike
- 2 Concepts** — 2–3 logo/identity routes
- 3 Refinement** — 2 rounds of revisions on the chosen route
- 4 Rollout** — social assets, icons, website direction, handover

Proposed timeline: **3–4 weeks** from kick-off to handover. Tell us if that's unrealistic.

05 Commercial terms

R25,000 flat, for everything in section 03

Payment — the honest version: we're pre-revenue and raising capital. Payment is either **(a)** in full when we close our raise, or **(b)** monthly instalments starting now (e.g. R5,000/month over 5 months) — your preference.

We'll put whichever option you choose in a simple one-page agreement, including what happens if the raise is delayed. Scope beyond section 03 gets quoted separately — we'd rather you flag it than absorb it.

06 What success looks like

Six months from now, everything Sold Direct puts out — a LinkedIn post, a pitch deck, a website page, a WhatsApp reply — is instantly recognisable as the same company, **without you having touched any of it since handover.**
