PropCtrl Superuser Setup

The Superuser account has the ability to create and maintain additional users from within PropCtrl. If the agency has one or multiple branches, the Superuser account will have access to all branches and is responsible for setting up the required User accounts.

PropCtrl Data Feed-Out : Yes ☐ No ☐

A Feed-Out to your bespoke website will require integration from your technology partner (TP) and may incur an additional cost. Please note that the integration is not a once-off and maintenance costs need to be considered as Property24 releases newer versions of the feed from time to time. Property24 will contact your TP and upon successful completion of vetting, will commence the integration.
